

**Instructor Name: *Mark A. Bottita***

**COM 10154B – Fundamentals of Public Speaking**

I think this class is great because it is going to help me to prepare myself when I am speaking to the public. I would have more knowledge in what I am going to talk about and I would not be that shy. I just sometimes feel discriminated because I feel he doesn't involve me as much as the class. I don't know if it is my race. Thanks.

He is doing a good job – especially considering he is using material put together by another teacher and not his own. He has to combine the two teaching methods. He has done a really good job helping the students who are struggling or are insecure about the class. He really is caring and makes class fun. He gives good feedback on speeches. I think he will continue to do well. There has been an improvement in what he expects of us since the start of class.

I enjoy this class and Professor Bottita. He does an awesome job teaching this class and I actually look forward to coming to class. He explains everything very clearly and is very reasonable. I wish I had another required class that he was the Professor of. He makes this class interesting and worth coming to.

I have found the class to be very helpful to me. I would recommend keeping class sizes small so students are not so fearful of getting up in front of the group. This has been a very fun class for me and I am very shy when it comes to public speaking.

To go over the material in class; let us know what to remember and what not to; give more details to better understand what it is that needs to be done.
